ASW ENERGY SERVICES

Asset End-Of-Life Investment Recovery

ASW Energy Services can provide utilities with a maximized return for assets that have reached end-of-life. This service provides for documentation and disposal of assets along with a maximized return through our investment recovery/recycling programs.

BACKGROUND AND CAPABILITIES

ASW Energy Services has been processing and disposing of assets that have reached end-of-life for over 10 years for Utility Companies & Cooperatives, and Asset Management Companies. These activities are completed in a safe, cost effective and compliant manner from acquisition to disposal. Capabilities include:

- Logistics expertise with a full range of collection and transportation options at cost effective rates
- Fully operational warehouse with multiple dock locations for receiving and shipping loads
- Full-time staff with significant experience in breaking down assets and preparing for recycling
- Multiple buyers/disposers providing full service disposal
- Competitive bidding process to maximize investment recovery rates for the asset owner

FULL CYCLE PROCESS OF DESTRUCTION

ASW Energy Services arranges for transportation of end-of-life assets to our facility in Mogadore, Ohio where items are processed for ultimate shipment to our disposal vendors, both domestic and international. All of our disposal vendors have been vetted for compliance with regulatory requirements and provide a certificate of disposal when required.
